# My 2 Goals For This Workshop

1. Give you some simple tactics you can DIY that will move the needle in some way on the SEO front so you get value from time invested here today >> new tactics you likely won't find from the typical SEO blogs
2. Show you a new way of looking at SEO or more accurately, how SEO works in 2018 which I \*hope\* will enable you to build or improve your own SEO strategy & tactics

# Where we're at with traffic & search today

1. Paid traffic from both Google AND Facebook is getting more expensive/  
aka attention is getting more expensive AND that attention is increasingly fragmented
2. Google is getting better at weeding the garbage out, it rewards brands and businesses who do SEO “right” - i.e. value & engagement over old school algorithm gaps style SEO >> more intent focussed too
3. Consumers are getting more tech savvy and increasingly moving spend online - in other words, total addressable market is probably increasing

# 1. - Owning the SERP for your brand

- Brand searches are most powerful & highest converting
- Brand searches are mostly ignored in SEO & by business owners!
- A single bad review can impact you massively - you need to protect against bad reviews
- Protect yourself against brand jacking
- Google values brand and brand mentions
- \*watch for adwords on your brand terms

# 1. - Owning the SERP for your brand

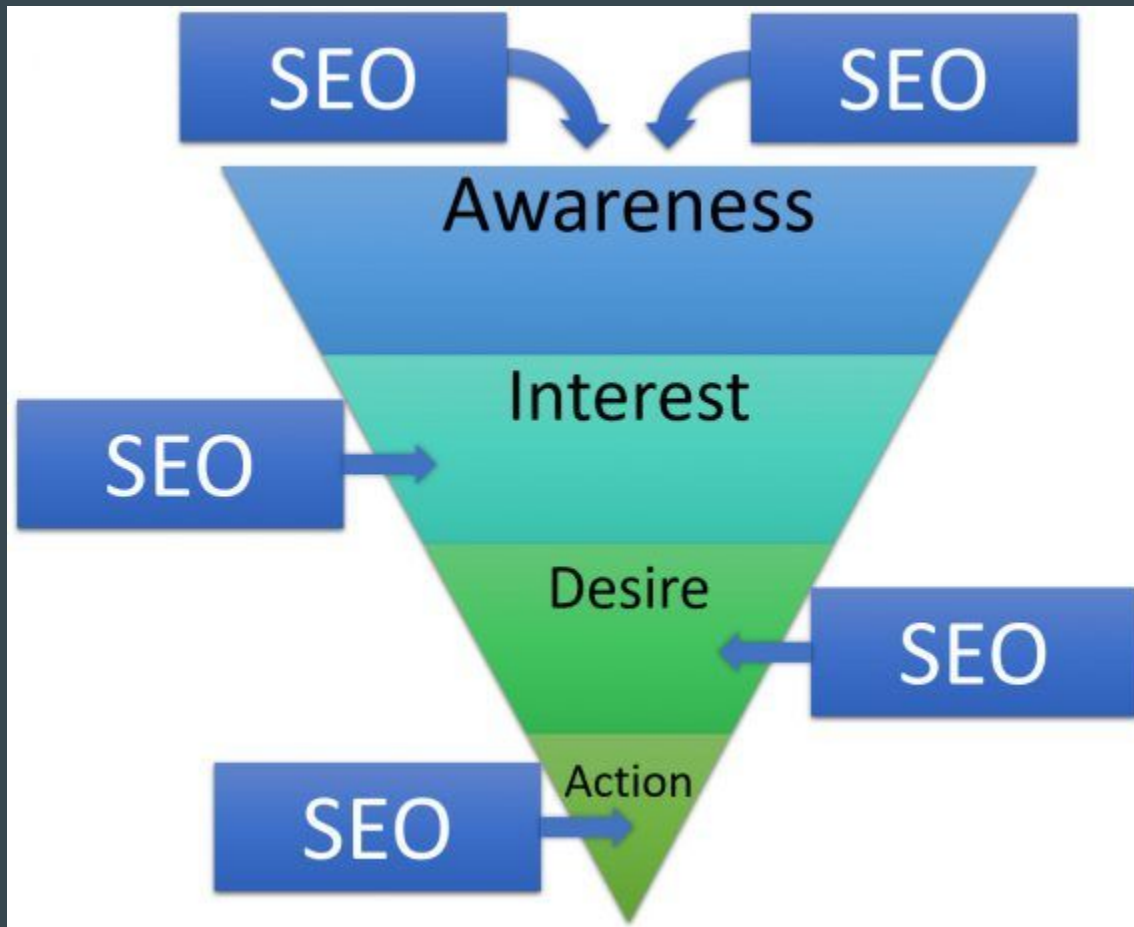

- Simple stuff - Google, Bing & Apple Maps -> *WP Speed Fix* *example*
- Review funnel so reviews happen on autopilot! -> *Didgeridoo Breath* *example*
- Claim all key social properties, link them and distribute content regularly >> repurpose content as part of your process.

## 2. - Keyword Content Matching

- Rules of the game:
  - 1 - you need a page of content for every term you want to rank for
  - 2 - you must have ONLY 1 piece of content for that term (homepage doesn't count)
- So, what terms do you want to rank for?
- Where do those terms sit in the “funnel”? Remember AIDA?

## 2. - Keyword Content Matching

## 2. - Easy keyword research:

- Brand name terms
- What products & services do you sell? Is there a page for each?
- What problems do your products and services sell? -> how to fix slow wordpress example
- What does the customer need to know before buying?
- What questions are they asking?
- Google Search Console, Adwords Data, KW Everywhere & Ahrefs
- Advanced: <https://ftf.agency/total-addressable-online-market/>
- Spreadsheet your keywords and match to a piece of content, if there's no content for a keyword, create it!

## 2. - Repurpose your paid content!

- We accidentally discovered this!

DidgeridooDojo.com example - short “preview” videos of content or some of the course for free:

## 3 - CTR Optimization - Social & Search

- We're fanatical about CTR - it gets no attention outside Adwords
- In the Adwords world that something as simple as swapping the top and bottom lines of your Adwords ad copy around can take CTR from 1% to 2% - that's a 100% improvement
- False assumption that "number 1" = all the traffic!  
More accurately, organic traffic = rankings AND a click  
Same with social, social traffic = shares AND a click

# How to:

- Write better copy, meta descriptions matter, look at competitors, outsell them in your copy (start with top 20 pages...4-6 meta descriptions an hour is a fast pace)
- Capitalize the start of all words + phone no in title tag
- All CAPS for important words, FREE, BONUS, FAST -> you can't do this for Adwords but can for SEO
- Custom Open Graph text + image for high impact pages

## 4. - Tracking & Analytics

- What gets measured gets managed!
- The tools we use:

## 6. - Simple Link Building

- Maps - Google, Bing, Apple & Facebook! Be a real business not just a website
- Claim all social properties - link them together and share content
- Video & audio - push on all platforms, FB, Youtube, Instagram, Vimeo, Dailymotion and syndicate
- Citations - a local SEO technique
- Get on podcasts or start a podcast
- Affiliates
